

SPIRE 1.1

A bold, new way to serve.

The new Spire 1.1 features a polished new look with innovative beverage dispensing abilities all wrapped up in one amazing compact footprint. Spire 1.1 includes the most advanced customer-facing beverage dispensing software available in the market today. This cutting-edge technology delivers a unique interactive beverage customization experience for your customers.

FLEXIBILITY & CONVENIENCE

We believe in flexibility and convenience. Our Spire system holds up to 12 brands or flavors in both carbonated and non-carbonated formats. With our multi-flavor option, pour up to 3 flavors simultaneously.

CUSTOMIZE TO YOUR NEEDS

Spire has a variety of configuration choices, including the ability to customize display videos, update the soda-to-flavor ratio, change the flavored water and soda buttons, disable the Flavor page, and much more. Sold-Out option available.

ADDITIONAL FEATURES

Spire features a flow rate of up to 2 ounces per second. Dual language support, recirculation capabilities, and remote options. A Nutritional Info page is available where required. Spire is ADA compliant.

UPGRADES & SUPPORT

Upgrades for brand updates, flavor changes and software are easy using Spire's USB port. Pour data and system statistics may also be downloaded via USB. Internationalization is available.
